

SME360XTM

SMALL & MEDIUM ENTERPRISES THREE SIXTY

Your Measure to Become
Greener and Competitive

Why was this tool created?

1

SMEs represent over 90% of global enterprises but they lack tools to measure their environmental impact.

2

SMEs don't have the time nor the human resources necessary to measure and improve their sustainability practices.

3

Obtain a competitive advantage from supply chain leaders and improve access to capital.

ICC SME360X

Why ICC?

1

ICC is a non-profit, intersectoral association, that brings together more than 45 million companies.

2

We are committed to making climate action a global issue and a matter that concerns us all, at COP26

3

An institution that aims to create **international standards**. A global standard for sustainable SMEs

> The ICC SME360X is a digital impact assessment tool for SMEs to **easily measure and economically value** greenhouse gas emissions, water consumption, air & land pollution, and waste generation.

Under the hood:

40+ person years of research

Combination of over 17K formulae

Global database updated by the cognitive search engines

Natural Capital Assessment

What it permits:

Economic value of impacts

Annual Assessment report

PROFILE OF
IMPACT ON
ENVIRONMENT

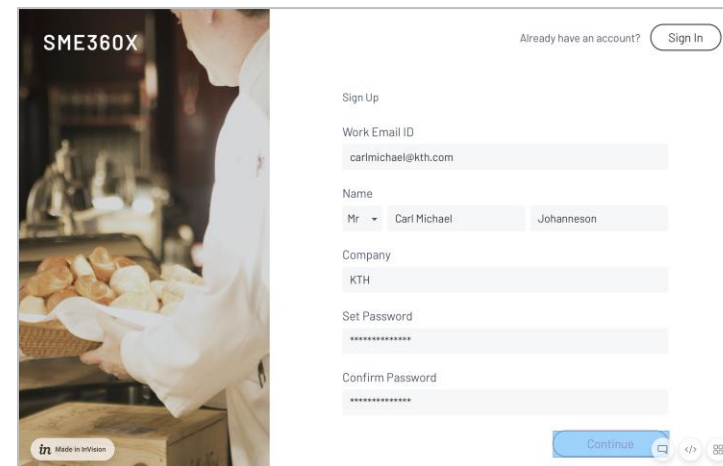

PIE Score

Industry-specific recommendations

ICC SME360X Global Trends

- >The ICC SME360X makes the intersection between **technology and sustainability**.
- > New ESG regulations in Europe, United States, Canada and other regions. COP26: it is time for SMEs to step up their climate action.
- > **An accessible, user-friendly and affordable tool.** SME360X was developed from global databases and it has been tested internationally.

ICC SME360X

Key features

Measurement

Input and quantify your environmental impacts

Materiality

Understand which impacts are **most material**

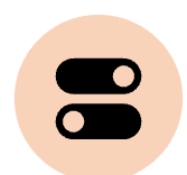

Benchmarking

Use a simple score to **compare performance against peers**

Reporting

Easily **report** on environmental performance

Action

Decide which **improvement / abatement** initiatives are most impactful

ICC SME360X

How it works

ICC International Chamber of Commerce

SME360X
Measure your Impact on Nature

100%

| | |
|------------------------|--------------|
| General Information | 4/4 |
| GHG Emissions | 12/12 |
| Air Pollution | 9/9 |
| Water Consumption | 3/3 |
| Water & Land Pollution | 15/15 |
| Waste Generation | 2/2 |
| Land Use Change | 2/2 |

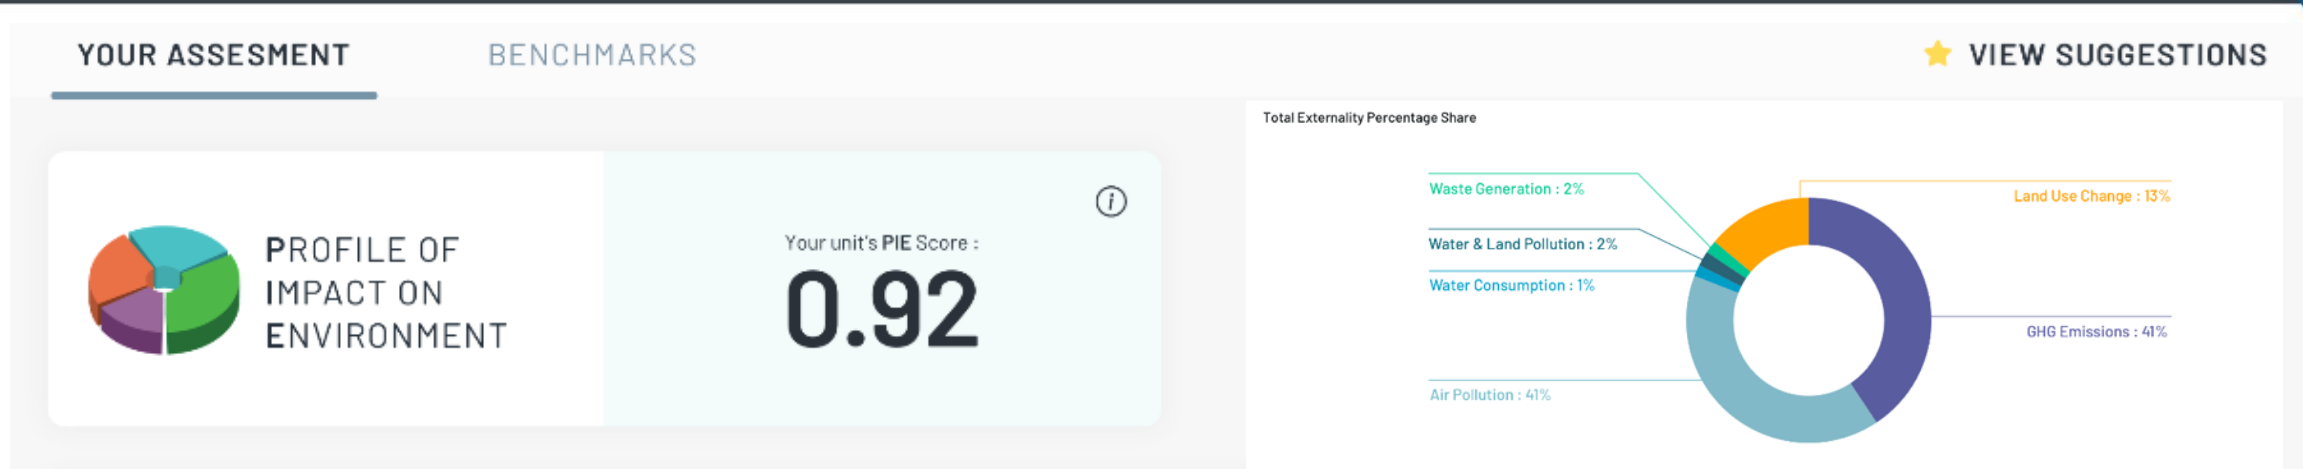

GHG Emissions

Scope 1 Emissions

| | | | | | |
|-----------------------------|-----|----------------------|-------------------------------------|-------|----------------------|
| Total Scope 1 GHG Emissions | 572 | [tCO ₂ e] | Total Biofuel Related GHG Emissions | 8 | [tCO ₂ e] |
| Total Avoided GHG Emissions | 100 | [tCO ₂ e] | Total Energy Consumption | 164.8 | [TJ] |

Fuel Use- Stationary Source

| Fossil Fuels | Annual Quantity | Unit | |
|---------------------------|-----------------|-------------------|---|
| Gas/Diesel Oil | 103 | [m ³] | ⊗ |
| Liquified Petroleum Gases | 51 | [tonnes] | ⊕ |
| Bio-based Fuels | Annual Quantity | Unit | |
| Charcoal | 27 | [tonnes] | ⊕ |

Impact Intensity: This is the societal economic cost of environmental impacts per million US dollars of company revenue.

The PIE score: is the intensity of the impact of a company's activity on society, compared to the intensity of the average impact of that company's sector on society.

- ✓ **Comparative analysis :** Compares the intensity of its impact with their peers and competitors at the national level.
- ✓ **Understands and improves their sustainability performance:** provides a unique environmental impact score that facilitates decision making and goal setting.
- ✓ **Environmental management:** offers the company the opportunity to present their information on their environmental performance, certified by the ICC.

Benefits for Chambers

SME360X will give Chambers the capacity to **track the environmental performance** of your members, specially SMEs.

This platform is the new **global standard** that all SMEs will use to measure their impact on the environment.

This tool will strengthen the **added value** that Chambers generate to society and investors.

The product will prove that chambers are real pioneers on **climate change mitigation**.

SME360X is one of the resources shared by the **Chambers Climate Coalition**.

Air Pollution: Outputs for Particulate Matter
